Options

Low-friction bearings

Order key

The encoder EI30 P 058 BB is also available as a particularly smooth- running low-friction encoder. The starting torque is thereby changed to approx. $\leq 0.6 \text{ Ncm}$ [0.85 in-ozf] at ambient temperature and the protection class at the shaft input to IP50.

LB

Low temperature

Order key

The encoder EI30 P 058 BB with the output circuit types C1, C2, C3, C4, C5, C6, D3, D4, D5, D6 is also available with the extended temperature range -40 °C up to $+85 \text{ °C}$ [-40 °F up to $+185 \text{ °F}$] (measured at the flange).

LT

Pressure equalising membrane

Order key

The EI30 P 058 BB shaft encoder is also optionally available with a pressure equalising membrane. This prevents water from penetrating into the encoder housing in the case of high air humidity.

PE

The IP67 protection level, temperature range and salt spray resistance are maintained.
Resistant to chemicals and solvents in accordance with DIN EN ISO 2812-1.

Cable length

Order key

The encoder EI30 P 058 BB can be supplied with more than 2 m cable.
The maximum cable length depends on the supply voltage and the frequency.

XXX = Decimeter

Please extend the standard order code with a three figure number, specifying the cable length in decimetres.
Example: 5 m cable = 050
