Notes

	Observe intended use!
	this product is not a safety sensor and is not intended as personnel protection.
	✤ The product may only be put into operation by competent persons.
•	% Only use the product in accordance with its intended use.

	For UL applications:
	✤ For UL applications, use is only permitted in Class 2 circuits in accordance with the NEC (National Electric Code).

		ATTENTION! LASER RADIATION – CLASS 1 LASER PRODUCT
	9	The device satisfies the requirements of IEC/EN 60825-1:2014 safety regulation
	U	 The device must not be tampered with and must not be changed in any way. There are no user-serviceable parts inside the device. Repairs must only be performed by Leuze electronic GmbH + Co. KG.

NOTE

Affix laser information and warning signs! Laser information and warning signs are affixed to the device. In addition, self-adhesive laser information and warning signs (stick-on labels) are supplied in several languages.

safety regulations for a product of laser class 1

- "Affix the laser information sheet to the device in the language appropriate for the place of use. When using the device in the US, use the stick-on label ¢, with the "Complies with 21 CFR 1040.10" note.
- 🗞 Affix the laser information and warning signs near the device if no signs are attached to the device (e.g. because the device is too small) or if the attached laser information and warning signs are concealed due to the installation position.
- 🗞 Affix the laser information and warning signs so that they are legible without exposing the reader to the laser radiation of the device or other optical radiation.

Notes

	WARNING!
0	If the scanner motor fails during the emission of laser radiation, the limit value of laser class 2 in accordance with IEC 60825-1 Edition 2.0 (2007) and Edition 3.0 (2014) could be exceeded. The device has safeguards to prevent this occurrence.
	✤ If the emitted laser beam is at a standstill, immediately disconnect the faulty bar code reader from the voltage supply.
	* The BCL 95 emits scanned optical radiation at a wavelength of 655 nm (red). Looking at the device's mirror and operating at the lowest scanning rate (400 scans/s) at a viewing distance of 65 mm results in pulses with a pulse duration of 120 µs on the retina of the eye. The total pulse peak power at the exit window is less than 2.1 mW. The average laser power is, thus, less than 1 mW, corresponding to laser class 2 in accordance with EN 60825-1, Edition 2.0 (2007) and IEC 60825-1, Edition 2.0 (2007) and IEC 60825-1, Edition 3.0 (2014) and IEC 60825-1, Edition 3.0 (2014).
