## 1 IO-Link interface

Available on pin 4 is the IO-Link interface in accordance with specification 1.1.2 (July 2013) with support of Smart Sensor Profile 2nd Edition (March 2017). You can easily, quickly and economically configure the devices via the IO-Link interface. Furthermore, the sensor transmits the process data via the IO-Link interface and makes diagnostic information available through it.

### 1.1 IO-Link identification

| VendorID dec/hex | DeviceID dec/hex | Device               |
|------------------|------------------|----------------------|
| 338/0x152        | 3097/0x000C19    | DMU420B-250.3/LC-M8  |
|                  | 3098/0x000C1A    | DMU420B-250.3/LV-M8  |
|                  | 3099/0x000C1B    | DMU420B-500.3/LC-M8  |
|                  | 3100/0x000C1C    | DMU420B-500.3/LV-M8  |
|                  | 3101/0x000C1D    | DMU420B-1000.3/LC-M8 |
|                  | 3102/0x000C1E    | DMU420B-1000.3/LV-M8 |

Please refer to the respective product data sheet for the identification data of other IO-Link devices.

### 1.2 IO-Link process data

#### Device input data (PDout – 1-bit data length)

| Bit offset | Data width in bits | Assignment         | Meaning  |
|------------|--------------------|--------------------|--|
| 2          | 1                  | Trigger            | The "trigger" executes a single measurement if index 78 subindex 13 has the value 2.   |
| 1          | 1                  | Find me            | The "Find me" function causes the green, yellow and red LEDs to flash to aid in locating the sensor.   |
| 0          | 1                  | Disable Transducer | "Disable Transducer" enables the deactivation of the transmitter- and receiving element. Measurement values or transmission signals are no longer transmitted. |

| Byte 0 | x | x | x | x | x | Trigger | Find Me | Disable |
|--------|---|---|---|---|---|---------|---------|---------|
|        | 7 | 6 | 5 | 4 | 3 | 2       | 1       | 0       |

## Device output data (PDI - 48-bit data length)

| Bit offset | Data width in bits | Assignment        | Meaning  |
|------------|--------------------|-------------------|--|
| 16         | 32                 | Measurement value | Current measurement value<br>Value range 10000 ... 270000 (Device ID 3097 & 3098)<br>Value range 15000 ... 530000 (Device ID 3099 & 3100)<br>Value range 20000 ... 1060500 (Device ID 3101 & 3102) |
| 8          | 8                  | Scale             | Measurement value multiplier as power of ten   |
| 5          | 1                  | SSC.4             | SSC.4  |
| 3          | 1                  | Alarm Output      | Alarm Output   |
| 2          | 1                  | Quality Bit       | Quality Bit  |
| 1          | 1                  | SSC.2             | SSC.2  |
| 0          | 1                  | SSC.1             | SSC.1  |

| Byte 0 | Measurement value |    |    |    |    |    |    |    |
|--------|-------------------|----|----|----|----|----|----|----|
|        | 31                | 30 | 29 | 28 | 27 | 26 | 25 | 24 |

| Byte 1 | Measurement value |    |    |    |    |    |    |    |
|--------|-------------------|----|----|----|----|----|----|----|
|        | 23                | 22 | 21 | 20 | 19 | 18 | 17 | 16 |

| Byte 2 | Measurement value |    |    |    |    |    |   |   |
|--------|-------------------|----|----|----|----|----|---|---|
|        | 15                | 14 | 13 | 12 | 11 | 10 | 9 | 8 |

| Byte 3 | Measurement value |   |   |   |   |   |   |   |
|--------|-------------------|---|---|---|---|---|---|---|
|        | 7                 | 6 | 5 | 4 | 3 | 2 | 1 | 0 |

| Byte 4 | Scale |   |   |   |   |   |   |   |
|--------|-------|---|---|---|---|---|---|---|
|        | 7     | 6 | 5 | 4 | 3 | 2 | 1 | 0 |

| Byte 5 | x | x | SSC.4 | x | Alarm | Quality Bit | SSC.2 | SSC.1 |
|--------|---|---|-------|---|-------|-------------|-------|-------|
|        | 7 | 6 | 5     | 4 | 3     | 2           | 1     | 0     |

### 1.3 Device-specific IODD

At [www.leuze.com](http://www.leuze.com) in the download area for IO-Link sensors you will find the IODD zip file with all files required for the installation.

On the IODDfinder platform (<https://ioddfinder.io-link.com/>), a central cross-manufacturer database, you can also find the description files (IODDs) of the IO-Link sensors.

## 1.4 IO-Link parameters documentation

The complete description of the IO-Link parameters can be found in the \*.html files. Double-click on a language variant in the directory containing the extracted files:

- German: \*IODD\*-de.html
- English: \*IODD\*-en.html

If the html file within the ZIP archive is opened, the image files are not displayed.

☞ Extract the ZIP file first.

## 1.5 Device-specific information

- This is a device with the Data Storage function, i.e., device exchange is possible without additional measures (such as teaching).
- In the PREOPERATE state, this device uses TYPE\_1\_V with 8 octets of on-request data.

Fundamentals:

- IO-Link Interface and System Specification Version 1.1.2, July 2013
- IO-Link Test Specification Version 1.1.2 July 2014

## 2 Functions configurable via IO-Link

PC configuration and visualization is performed comfortably with the USB-IO-Link Master SET MD12-US2-IL1.1 (part no. 50121098) and the *Sensor Studio* configuration software (in the download area of the sensor at [www.leuze.com](http://www.leuze.com)).

### System commands

| NOTICE  |          |  |                   |        |                                 |         |  |
