

# Technical data sheet Safety light curtain receiver

Part no.: 68003327 MLC530R30-2700

# **Technical data**

## **Basic data**

| Series      | MLC 500                |
|-------------|------------------------|
| Device type | Receiver               |
| Contains    | 2x BT-NC sliding block |
| Application | Hand protection        |

### **Functions**

| Function package | Extended  |
|------------------|---|
| Functions        | Combination of floating/fixed blanking,<br>can be changed to "fixed blanking"<br>during operation |
|                  | Configuration by means of wiring  |
|                  | Contactor monitoring (EDM)  |
|                  | Fixed blanking with 1-beam tolerance  |
|                  | Fixed blanking without tolerance  |
|                  | Fixed blanking without tolerance, can be activated/deactivated during operation                   |
|                  | Floating blanking, can be changed to<br>"fixed blanking" during operation                         |
|                  | Integration of "contact-based safety<br>circuit"  |
|                  | Integration of "electronic safety-related<br>switching outputs"                                   |
|                  | MaxiScan  |
|                  | Partial muting  |
|                  | Reduced resolution, can be changed to<br>"fixed blanking" during operation                        |
|                  | Start/restart interlock (RES)   |
|                  | Timing controlled 2-sensor muting   |
|                  | Transmission channel changeover   |

## **Characteristic parameters**

| Туре                        | 4, IEC/EN 61496          |
|-----------------------------|--------------------------|
| SIL                         | 3, IEC 61508             |
| SILCL                       | 3, IEC/EN 62061          |
| Performance Level (PL)      | e, EN ISO 13849-1        |
| PFH <sub>D</sub>            | 7.73E-09 per hour        |
| Mission time T <sub>M</sub> | 20 years, EN ISO 13849-1 |
| Category                    | 4, EN ISO 13849          |
|                             |                          |

### **Protective field data**

| Resolution              | 30 mm    |
|-------------------------|----------|
| Protective field height | 2,700 mm |

#### **Optical data**

Synchronization

## **Electrical data**

Protective circuit

|                               | Short circuit protected |
|-------------------------------|-------------------------|
|                               |                         |
| Performance data              |                         |
| Supply voltage U <sub>B</sub> | 24 V, DC, -20 20 %      |
| Current consumption, max.     | 150 mA                  |

24 V, DC, -20 ... 20 % 150 mA 2 A semi time-lag

Overvoltage protection

Optical between transmitter and receiver

#### Inputs

Fuse

Number of digital switching inputs 3 Piece(s)

# Leuze

| Switching inputs             |                         |
|------------------------------|-------------------------|
| Туре                         | Digital switching input |
| Switching voltage high, min. | 18 V                    |
| Switching voltage low, max.  | 2.5 V                   |
| Switching voltage, type.     | 22.5 V                  |
| Voltage type                 | DC                      |

#### Outputs

Number of safety-related switching 2 Piece(s) outputs (OSSDs)

| Safety-related switching outputs |                                      |
|----------------------------------|--------------------------------------|
| Туре                             | Safety-related switching output OSSD |
| Switching voltage high, min.     | 18 V                                 |
| Switching voltage low, max.      | 2.5 V                                |
| Switching voltage, type.         | 22.5 V                               |
| Voltage type                     | DC                                   |
| Current load, max.               | 380 mA                               |
| Load inductivity                 | 2,000 µH                             |
| Load capacity                    | 0.3 μF                               |
| Residual current, max.           | 0.2 mA                               |
| Residual current, type.          | 0.002 mA                             |
| Voltage drop                     | 1.5 V                                |
|                                  |                                      |

| Safety-related switching output 1 |                     |
|-----------------------------------|---------------------|
| Assignment                        | Connection 1, pin 5 |
| Switching element                 | Transistor, PNP     |

| Safety-related switching output 2 |                     |
|-----------------------------------|---------------------|
| Assignment                        | Connection 1, pin 6 |
| Switching element                 | Transistor, PNP     |

### **Time behavior**

| Response time                              | 24 ms             |
|--|-------------------|
| Restart delay time                         | 100 ms            |
| Connection                                 |                   |
| Number of connections                      | 1 Piece(s)        |
|  |                   |
| Connection 1                               |                   |
| Function                                   | Machine interface |
| Type of connection                         | Connector         |
| Thread size                                | M12               |
| Material                                   | Metal             |
| No. of pins                                | 8 -pin            |
|  |                   |
| Cable properties                           |                   |
| Permissible conductor cross section, type. | 0.25 mm²          |
| Length of connection cable, max.           | 100 m             |
| Permissible cable resistance to load, max. | 200 Ω             |
|  |                   |

# **Technical data**

# Leuze

## Mechanical data

| Dimension (W x H x L) | 29 mm x 2,766 mm x 35.4 mm |
|-----------------------|----------------------------|
| Housing material      | Metal                      |
| Metal housing         | Aluminum                   |
| Lens cover material   | Plastic / PMMA             |
| Material of end caps  | Diecast zinc               |
| Net weight            | 2,850 g                    |
| Housing color         | Yellow, RAL 1021           |
| Type of fastening     | Groove mounting            |
|                       | Mounting brackets          |
|                       | Mounting on Device Column  |
|                       | Swivel mount               |
|                       |                            |

## **Operation and display**

| Type of display | 7-segment display |
|-----------------|-------------------|
|                 | LED               |
| Number of LEDs  | 3 Piece(s)        |

#### **Environmental data**

| Ambient temperature, operation     | -30 55 °C |
|------------------------------------|-----------|
| Ambient temperature, storage       | -30 70 °C |
| Relative humidity (non-condensing) | 0 95 %    |

### Certifications

| Degree of protection | IP 65          |  |  |
|----------------------|----------------|--|--|
| Protection class     | III            |  |  |
| Approvals            | c TÜV NRTL US  |  |  |

## **Dimensioned drawings**

All dimensions in millimeters

## Calculation of the effective protective field height $H_{PFE} = H_{PFN} + B + C$

 $H_{PFE}$  Effective protective field height = 2728 mm

9 mm

 $H_{PFN}$  Nominal protective field height = 2700 mm

А Total height = 2766 mm

В 19 mm R

Effective protective field height  $\rm H_{PFE}$  goes beyond the dimensions of the optics area to the outer borders of the circles labeled with R.

# **Electrical connection**

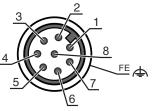

## **Connection 1**

| Function           | Machine interface |
|--------------------|-------------------|
| Type of connection | Connector         |
| Thread size        | M12               |
| Туре               | Male              |
| Material           | Metal             |
| No. of pins        | 8 -pin            |
| Encoding           | A-coded           |
| Connector housing  | FE/SHIELD         |
|                    |                   |

#### Pin **Pin assignment**

## **Conductor color**

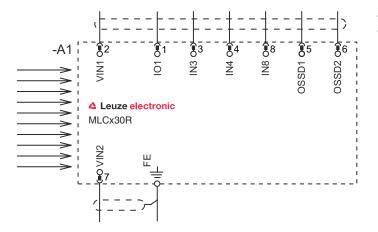

| 1 | IO1   | White  |   |
|---|-------|--------|---|
| 2 | VIN1  | Brown  |   |
| 3 | IN3   | Green  | 4 |
| 4 | IN4   | Yellow |   |
| 5 | OSSD1 | Gray   |   |
| 6 | OSSD2 | Pink   |   |
| 7 | VIN2  | Blue   |   |
| 8 | IN8   | Red    |   |
|   |       |        |   |

# **Circuit diagrams**

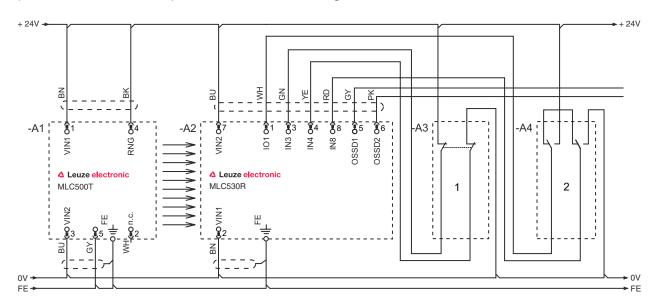

Connection diagram receiver

VIN1 = +24 V, VIN2 = 0 V: transmission channel C1 VIN1 = 0 V, VIN2 = +24 V: transmission channel C2

Operating mode 1: circuit diagram example of linkage with position switch for monitoring for the presence of machine parts with fixed blanking

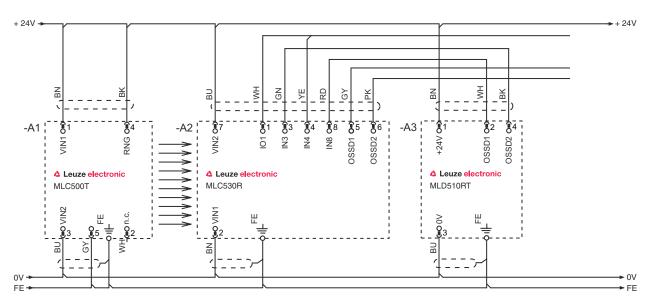

1 Linked safety sensor, e.g. safety door switch

2 Key switch for teaching ("teach key switch")

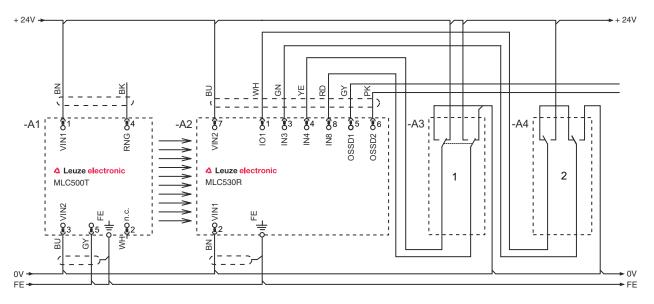

# Leuze

# **Circuit diagrams**

Operating mode 2: circuit diagram example of linkage of electronic safety-related switching outputs for the combined monitoring of access points and areas

Operating mode 3: circuit diagram example of a linked, contact-based position switch for monitoring of the blanked object and a changeover switch for switching between function groups FG1 and FG2

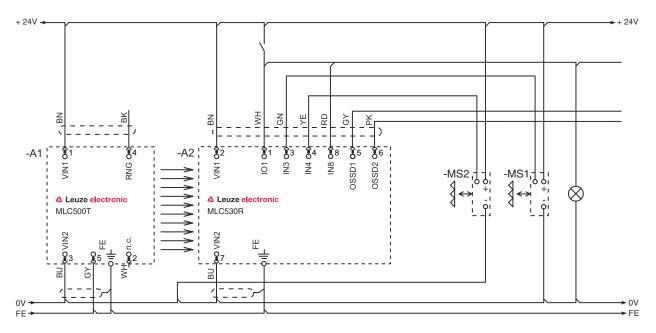

1 Changeover key switch for switching between function groups FG1 and FG2

2 Key switch for teaching blanking areas

# **Circuit diagrams**

# Leuze

## Operating mode 4: circuit diagram example for timing controlled 2-sensor muting

# **Operation and display**

| LED | Display                     | Meaning  |
|-----|-----------------------------|--|
| 1   | Off                         | Device switched off  |
|     | Red, continuous light       | OSSD off   |
|     | Red, flashing, 1 Hz         | External error   |
|     | Red, flashing, 10 Hz        | Internal error   |
|     | Green, flashing, 1 Hz       | OSSD on, weak signal   |
|     | Green, continuous light     | OSSD on  |
| 2   | Off                         | RES deactivated or RES activated and enabled or RES blocked and<br>protective field interrupted                          |
|     | Yellow, continuous light    | RES activated and blocked but ready to be unlocked - protective field<br>free and linked sensor is enabled if applicable |
|     | Yellow, flashing            | Upstream safety circuit opened   |
|     | Yellow, flashing (1x or 2x) | Changeover of the upstream safety circuit  |
| 3   | Off                         | No special function (blanking, muting, etc.) active  |
|     | Blue, continuous light      | Protective field parameter (blanking) correctly taught   |
|     | Blue, flashing, 1 Hz        | Muting active  |
|     | Blue, short flashing        | Teaching of protective field parameters or muting restart required or<br>muting override active                          |
|     | Blue, flashing, 10 Hz       | Error during teaching of protective field parameters   |
