### Basic data

| Series              | 318B                  |
|---------------------|-----------------------|
| Operating principle | Throughbeam principle |
| Device type         | Transmitter           |
|                     |                       |
| Special version     |                       |
| Special version     | Deactivation input    |
|                     |                       |
| Optical data        |                       |
|                     |                       |

| Operating range          | 0 16 m                               |
|--------------------------|--------------------------------------|
| Operating range          | Guaranteed operating range           |
| Operating range limit    | 0 23 m                               |
| Operating range limit    | Typical operating range              |
| Light source             | LED, Infrared                        |
| Wavelength               | 850 nm                               |
| Transmitted-signal shape | Pulsed                               |
| LED group                | Exempt group (in acc. with EN 62471) |
|                          |                                      |

# Note

🖔 A list with all available device types can be found on the Leuze website at www.leuze.com.

### **Notes**

### Observe intended use!

- This product is not a safety sensor and is not intended as personnel protection.
- Only use the product in accordance with its intended use.

## For UL applications:

- 🕏 For UL applications, use is only permitted in Class 2 circuits in accordance with the NEC (National Electric Code).
- 🖖 These proximity switches shall be used with UL Listed Cable assemblies rated 30V, 0.5A min, in the field installation, or equivalent (categories: CYJV/ CYJV7 or PVVA/PVVA7)
